

P01 Each box below is 16.5pt wide and 93.75pt high, so a horizontal line in it has 16.5pt of measure and a vertical one 93.75pt. Read which way the text runs and how many lines it takes.

P02 A: layout-flow:vertical, which Word reads as its tbRl - the text runs down the box.

P03 A tail paragraph, so the box has a line to be anchored to.

P04 B: layout-flow:vertical with mso-layout-flow-alt:bottom-to-top, Word's btLr - the text runs up the box.

P05 A tail paragraph, so the box has a line to be anchored to.

P06 C: the control, no layout-flow at all - the same box laid out across its 16.5pt width.

P07 A tail paragraph, so the box has a line to be anchored to.

P08 D: the same rotation as a table asks for it, w:textDirection btLr in the first cell of a two-cell row 93.75pt (1875 twips) tall.

	The cell beside it, whose text is horizontal. The quick brown fox jumps over the lazy dog while the farmer watches from the gate.
Vertical legend D	

P09 after.
