

P01 This package has no theme part. Each pair of lines below is one way of asking for a theme face, at 11pt: read the FACE the glyphs are drawn in and the advance of the whole line, against the two explicit controls at the end.

P02 A: w:rFonts w:asciiTheme="minorHAnsi" w:hAnsiTheme="minorHAnsi", the body slot, with no explicit face.

P03 0123456789 0123456789 0123456789

P04 abcdefghijklmnopqrstuvwxyz abcdefghijklmnopqrstuvwxyz

P05 B: w:rFonts w:asciiTheme="majorHAnsi" w:hAnsiTheme="majorHAnsi", the heading slot.

P06 0123456789 0123456789 0123456789

P07 abcdefghijklmnopqrstuvwxyz abcdefghijklmnopqrstuvwxyz

P08 C: a run with no w:rPr at all, so its face and size come from the document defaults, whose w:rFonts is itself minorHAnsi and whose w:sz is 22.

P09 0123456789 0123456789 0123456789

P10 abcdefghijklmnopqrstuvwxyz abcdefghijklmnopqrstuvwxyz

P11 D: the control, an explicit w:ascii="Calibri" at 11pt - what docx4j answers for the minorHAnsi slot of its built-in theme.

P12 0123456789 0123456789 0123456789

P13 abcdefghijklmnopqrstuvwxyz abcdefghijklmnopqrstuvwxyz

P14 E: the second control, an explicit w:ascii="Cambria" at 11pt - what docx4j answers for the majorHAnsi slot.

P15 0123456789 0123456789 0123456789

P16 abcdefghijklmnopqrstuvwxyz abcdefghijklmnopqrstuvwxyz

P17 after.
