

P01 Tokens of digits and underscores, every character of which is exactly 120 twips wide in Liberation Serif at 12pt. The body's measure here is 9620 twips = 481.0pt exactly; the cells below are 4100 twips = 205.0pt, with no cell margin and no border, so nothing is charged against their measure. Each token paragraph carries no label, because a label would move the token.

P02 BODY: the measure is 9620 twips = 481.0pt, and 80 characters of the token fill 480.0pt of it.

P03 BODY-A: a token of 88 characters, 528.0pt, which is 48.0pt longer than the measure.

01234567

P04 BODY-B: a lead run of 132.3pt, then a token of 61 characters, 366.0pt, which is longer than the 348.7pt the lead leaves on the line but shorter than the whole measure.

B lead text, then the token:

0123456789012345678901234567890123456789012345678901234567890

P05 BODY-C: a token of 80 characters, 480.0pt, 1.0pt inside the measure: the longest token which fits.

0123456789012345678901234567890123456789012345678901234567890123456789

P06 BODY-D: a token of 81 characters, 486.0pt, 5.0pt over the measure: the shortest token which does not fit.

P07 CELL: the measure is 4100 twips = 205.0pt, and 34 characters of the token fill 204.0pt of it.

P08 CELL-A: a token of 42 characters, 252.0pt, which is 48.0pt longer than the measure.

0123456789012345678901234567890123
45678901

P09 CELL-B: a lead run of 132.3pt, then a token of 15 characters, 90.0pt, which is longer than the 72.7pt the lead leaves on the line but shorter than the whole measure.

B lead text, then the token:

012345678901234

P10 CELL-C: a token of 34 characters, 204.0pt, 1.0pt inside the measure: the longest token which fits.

0123456789012345678901234567890123

P11 CELL-D: a token of 35 characters, 210.0pt, 5.0pt over the measure: the shortest token which does not fit.

0123456789012345678901234567890123
4

P12 CELL-E: the corpus's own token, KAP_DUCTLENGTH_FEEDER_KOPA, which is 200.67pt in this face, in the same 4100-twip cell but with Word's default 108-twip cell margins, so the measure is 194.2pt and the token does not fit. This is the corpus's own configuration.

KAP_DUCTLENGTH_FEEDER_KOP
A

P13 BODY-E: the same token in the body, where it fits with room to spare (the control).

KAP_DUCTLENGTH_FEEDER_KOPA

P14 after. The quick brown fox jumps over the lazy dog while the farmer watches from the gate.
