

P01 Document defaults are NOT bold. Every case below is one run, so each line is wholly one weight; the line says which case it is.

case 1: paragraph style ProbeBold is w:b, the run is in character style ProbeUnbold which is w:b w:val=0 - one level true, one explicitly false

case 2: firstCol table-style condition w:b, run in character style ProbeStrong which is w:b - two levels true	case 2 note: this cell is not firstCol, so no condition applies to it
case 3: the same firstCol cell, a plain run - one level true	case 3 note: this cell is not firstCol either

case 4: paragraph style ProbeBold is w:b and the run is in character style ProbeStrong which is w:b - two levels true

case 5a: Normal paragraph, plain run, no level states the weight - the regular control

case 5b: paragraph style ProbeBold is w:b, plain run - the bold control
